

Hematology/Oncology Telemedicine Program

Location code L1IMNY

Medical students/graduates will be using applications like Zoom for patient interaction. All students must protect the health information of the patient to maintain HIPAA compliance.

Rotation details:

- Medical students/graduates will get a chance to interact with patients through Telemedicine. Students have to take a detailed history and enter notes on their laptop/computer.
- All rotating students will be given orientation on how to interact and take a detailed history of the patients.
- Only those students who will be working at the office will be given access to the EMR. Those students who don't have access to the EMR have to take a much-detailed history to get a complete picture of the patient's diagnosis and management.
- This will help the medical students/graduates in developing their questioning skills with minimal handed information as in a simulated Step 2 CS exam.
- Every patient encounter will be followed by presenting the case to the physician and discussing the patient management.
- Each student will interact with 5-7 patients/day.
- Every Friday, each student will present 1 case or topic to the entire team followed by case discussion.
- Office hours will be **9:00 am to 5:00 pm ET Time (New York Time)** and can be **accessible from any part of the world.**
- **Letter of recommendation** will be issued on Kingsbrook Jewish Medical Center's letterhead based on the **merit** of the individual.

Requirements/Expectations from the student:

- Access to high speed internet and devices like iPad/phones for using software apps like Zoom etc
- Availability during the regular office hours 9:00 am to 5:00 pm (Eastern time)
- Professional dress and appearance
- Quiet work space at the remote location with no background disturbance

Documents required:

- Valid Passport
- Proof of being in medical school/medical school graduation certificate
- USMLE STEP scores (if given)
- HIPAA certificate
- Infection control certificate
